1. Usually the first step to fit a decision tree classifier using scikit learn is to:

1 / 1 point

- ☐ import decision tree from the sklearn.tree module
e.g. from sklearn.tree import DecisionTree
- ☐ import classifier from the decision tree module
e.g. from sklearn.decisiontree import Classifier
- ☒ import decision tree classifier from the sklearn.tree module
e.g. from sklearn.tree import DecisionTreeClassifier

Correct! This is the correct way to import the decision tree classifier module from sklearn. You can find more information on the sklearn documentation or in the Decision Tree Jupyter Notebook demonstration.

- ☐ import tree classifier sklearn.decisiontree module
e.g. from sklearn.decisiontree import TreeClassifier
