1. What type of forest is a classification algorithm that potentially contains hundreds of different decision trees?   1 / 1 point

   ○ Global Forest

   ○ Model Forest

   ⦿ Random Forest

   > Correct! A Random Forest is a classification algorithm that potentially contains hundreds of different decision trees

   ○ The Multiple Forest

2. When describing models what type of model will feature coefficients help to explain?   1 / 1 point

   ○ SVM

   ○ KNN

   ○ Global Surrogate model

   ⦿ Linear Model

   > Correct! Feature coefficients help to explain linear models.

3. What type of surrogate model tries to approximate a black-box model globally on every instance in the data set?   1 / 1 point

   ○ Local Surrogate model

   ○ Strategic Surrogate model

   ○ Complex Surrogate model

   ⦿ Global Surrogate model

   > Correct! The Global Surrogate model tries to approximate a black-box model globally on every instance in the data set?
